PROJECTS & HR SIMULATIONS

GE Aerospace – HR Simulation (Forage) | Mar 2026

- Analyzed 3+ HR workflow scenarios using Excel-based process mapping to identify gaps in task flow, approval delays, and process inefficiencies, and proposed structured improvements.
- Developed 2 structured performance feedback reports for simulated employee cases, improving clarity in communication of expectations, strengths, and development areas.
- Applied Lean methodology to 1 end-to-end HR process simulation, identifying 4–5 non-value-added steps and recommending streamlined workflow improvements.

Campus Recruitment Simulation (Forage) | Feb 2026

- Supported campus recruitment strategy development by creating 2 employer branding and storytelling messaging frameworks to improve candidate communication consistency across recruitment scenarios.
- Conducted 5+ simulated candidate coaching sessions covering resume review, application support, and interview preparation, improving application structure and readiness.
- Designed a pre-onboarding engagement plan including 6 communication touchpoints (email + timeline plan + checklist) to support structured intern onboarding readiness.
