

Memo: Campus Recruitment Strategy for Beta Company Internship Program

To: Head of Early Talent Recruiting, Beta Company

From: Navpreet Kaur

Subject: Recruitment & Communications Strategy – University of Waterloo Campus Launch

Date: May 18, 2026

1. Why Beta Company Should Recruit from the University of Waterloo

- **Strong technical and co-op talent pipeline:** The University of Waterloo is globally recognized for its co-operative education model, producing students with extensive real-world experience in Software Engineering, Computer Science, Business, and Health Sciences—directly aligned with Beta Company’s internship roles.
 - **Innovation-driven student culture:** Waterloo students are heavily engaged in startups, hackathons, research labs, and entrepreneurship programs, which reflects Beta Company’s value of *“Anything is Possible”* and its focus on innovation and problem-solving.
 - **Diverse and multidisciplinary talent pool:** The campus attracts international students and interdisciplinary learners across pre-med, nursing, psychology, marketing, and engineering—supporting Beta Company’s goal of building inclusive, user-centered healthcare solutions.
 - **Strong alignment with co-op and applied learning mindset:** Students are highly motivated by experiential learning, making them well-suited for Beta Company’s internship structure, which emphasizes real projects, mentorship, and portfolio development.
-

2. Why Students from the University of Waterloo Should Be Interested in Beta Company

- **Meaningful impact in healthcare technology:** Beta Company’s mission to remove communication barriers between patients and doctors strongly appeals to students seeking purpose-driven work that improves real-world healthcare access and equity.
- **Structured internship with career pathway:** The program offers a full-time return offer, giving students a clear transition into early career roles with a growing health-tech organization.

- **Hands-on ownership of projects:** Interns contribute to real business and product outcomes, building a strong portfolio that enhances employability in competitive fields like tech, product, and healthcare innovation.
 - **Mentorship and professional development:** Monthly seminars and senior mentorship provide structured learning, leadership exposure, and career coaching—highly valued by Waterloo students who prioritize career acceleration.
-

3. Recruitment Awareness & Communication Strategy

- **Career Services partnership & co-op portal postings:** Work directly with the University of Waterloo Centre for Career Development to post roles on WaterlooWorks and host information sessions.
 - **Student club engagement strategy:** Partner with key clubs such as computer science societies, Women in Engineering, pre-med clubs, business societies, and UX/design groups to host targeted info sessions and networking events.
 - **Campus ambassador program:** Recruit Waterloo student ambassadors to promote Beta Company across classrooms, Discord groups, LinkedIn, and campus events to increase peer-to-peer trust and visibility.
 - **Hackathons, case competitions & sponsorships:** Sponsor or participate in technical hackathons and healthcare innovation challenges to directly engage high-performing students in real-time problem-solving environments.
 - **Targeted digital marketing campaign:** Use LinkedIn, Instagram, and university email newsletters with tailored messaging highlighting “real healthcare impact + paid internship + return offer opportunity.”
-

Summary:

The University of Waterloo offers a highly skilled, innovation-focused, and career-driven student population that strongly aligns with Beta Company’s mission and values. A structured campus engagement strategy combining career services, student organizations, and experiential recruitment events will ensure strong awareness and high-quality applicant pipelines for the inaugural internship program.
